DOG IS LOVE – A BRIEF REVIEW

Have you wondered why you feel such a strong bond with your dog? Does your dog adore you because you know where the dog food is located or is it something more? Clive Wynn, a behavioral scientist with a fascination for dogs, is the author of *Dog Is Love—Why and How Your Dog Loves You*. Wynn has drawn on cutting-edge research to show why he believes that a single, simple trait gives dogs the superpower that makes them such perfect companions for us.

Club member Molly Hughes will review this book at our meeting. You will learn about some of the research presented in the book including why he believes dogs are so special. This book is not a dry, scientific tome, but a fascinating and lively look at what goes on inside of our furry companions. In fact, *Dog Is Love* sold out on Amazon in December! In case you didn't get your copy (or you are too busy to read it) or if you read it and want to share your thoughts—this presentation is for you.

And, there will be a drawing for a copy of the book!!!

Well behaved and healthy Cavaliers are welcome - current vaccinations are required.
